Equations to solve in your head

$$6{,}751x + 3{,}249y = 26{,}751$$

$$3{,}249x + 6751y = 23{,}249$$

Is this a joke? Not if you can multiply the first equation by 6,751 and the second by 3,249 in your head, and not if you use a second, simpler method!
